

*The source of the best juice*

## **SOME POINTS TO CONSIDER WHEN DECIDING WHAT ZUMMO™ MACHINE BEST FITS YOUR BUSINESS NEEDS**

**First things for you to consider is what are your current and future juicing requirements? This means what fruit you are going to use, the size of the fruit and the quantity of fruit that you need to juice daily to achieve your juice requirements. Who is going to use the machine, you or the customer? How do you expect your business to grow with increased juicing needs?**

### **Z1.**

**This machine is extremely suitable for small cafes with juicing needs up to 30 servings per day.**

**This machine is best suited for smaller oranges of size 90 to 100 per carton. The machine needs to be manually loaded with 6-7 oranges and can juice 6.5 oranges per minute producing approximately 400mls or 1 serving per minute.**

**This a very affordable and profitable automatic orange juicing machine. Small footprint requiring just H 680mm W 340mm x D 390mm.**

## **Z06.**

**This machine is suitable for small to medium size businesses.**

**This is a very versatile machine that juices 10 fruits per minute. The machine needs to be manually loaded with 8-9 fruits from the attractive fruit storage basket.**

**The main advantage to this machine is that it is a versatile juicer that can be loaded with different citrus varieties to provide a juice that can be a mix of flavours and colours. E.g. blood oranges, mandarin and orange flavours.**

**This machine will produce approximately 700ml per minute or 2 servings dependent on serving size and fruit yield.**

**This is not a commercial juice production machine.**

**This machine is fantastic for oranges, pomegranates, grapefruit, lemons and limes.**

**Footprint of H 720mm x W 500mm x D 420mm**

## **Z14.**

**This is the entry level commercial juice production machine. Very suitable for larger cafes, restaurants, juice bars and commercial juicing operations. The standard fruit hopper holds up to 10kg of fruit and it has an optional 20kg hopper. The machine is a fully automatic 11 fruit per minute squeezer and can be set to squeeze a set quantity of fruit or it can be set to continuous operation for juice production needs. It will produce approx 1000ml or 3 servings per minute dependant on fruit size**

**As with all the ZUMMO™ machines it is a highly attractive piece of equipment that fits in perfectly with modern food service business décor. The machine has a variety of configurations with Self Service, 6 litre storage tank, refrigerated cabinet.**

**This machine is suitable for oranges, lemons, limes, grapefruit and pomegranates. It is suitable for fruit sizes 45-90mm and has an optional lemon and lime squeezing kit.**

**Footprint of H 800mm x W 480mm x D 450mm**

## **Z14 Self Service.**

**This has the same specifications as the Z14 except that this machine is specifically developed so as to allow the customer to operate the machine by depressing the tap which automatically starts the machine and dispenses fresh juice.**

**This machine is most suitable for breakfast buffets in hotels, cafeterias or establishments that can allow for customer self-service.**

**The machine can be fitted with an optional 20kg hopper to increase juicing capacity between servicing. This machine is shown on the optional stainless steel cabinet with internal large capacity waste peel collection bins that extend serving intervals. Machine Footprint of W 480mm x D 450mm x H 800mm.**

**Cabinet Footprint W 800mm x D 600mm. These can be custom made to suit your particular application.**

## **Z40.**

**This is the machine for those businesses that need to produce large quantities of fresh orange/citrus juice. The machine will process 40 fruits per minute (7 to 10kg) producing 2.5 – 3.0 litres per minute dependant of fruit size and yield. That is 1 box of fruit every 2 minutes. 400-600kg of fruit per hour producing 150 – 180 litres per hour.**

**It is capable of handling fruit sizes from 50 to 100mm. The fruit hopper holds 20kg of fruit. It can be set to squeeze a set quantity of fruit or continuous operation for production purposes. The machine has a self-cleaning pulp filter and when set on a cabinet with large capacity waste peel collection bins requires minimal maintenance when in operation.**

**This machine is suitable for squeezing lemons, oranges, grapefruit and pomegranates.**

**Footprint H 980mm x W 600mm x D 545mm.**

## **Z40 Self Service**

**The Z40 machine also is able to be configured in Self-Service mode for establishments that can allow for customer self-service such as high volume cafeterias, supermarkets and fruit barns that have the machine set up to allow customers to bottle their own fresh squeezed orange juice.**

**This machine is suitable for squeezing lemons, oranges, grapefruit and pomegranates. Footprint H 980mm x W 600mm x D 545mm.**

**This machine is shown on the optional Stainless Steel cabinet W 800mm x D 600mm that allows for the provision of large capacity waste peel bins inside the cabinet that extends the service times of the machine before it requires attention. Perfect for hotel buffet breakfast areas. Cabinet can be custom built to suit your particular application.**
