

Zummo Juicers Service Bulletin - September 2021

Subject: Daily & Monthly Cleaning of Self-Service tanks fitted with tomlinson tap.

Models: Z40C, Z40 2.0, Z40 Nature & Z14 Self-Serve tanks with tomlinson taps.

Attention Zummo Customer

During routine service inspections it has come to our attention a critical part of your Zummo Self-Serve machine is receiving inconsistent cleaning. This is resulting in a build up of stale juice & debris. This can cause premature wear of the tap seat. To prevent this from occurring we recommend the tap to be back flushed & sanitized **daily** and the dismantling of the tap & seal to be thoroughly cleaned on a **monthly** basis.

Please see below step by step instructions on how to carry out the cleaning procedure.

Tomlinson Tap: Back Flush Procedure

Version 1.0

The following procedure ensures correct process is followed when back flushing the tomlinson tap for **daily** cleaning.

Step 1. Remove S-Serve tray from machine and rinse with warm soapy water.

Step 2. Invert tray and place under warm water, allowing water to enter faucet.

Step 3. Pull faucet tap up to allow warm water to flow back through tomlinson tap.

Step 4. Fill tray with warm soapy water and open faucet tap. Repeat process to ensure all soap suds have been flushed.

Step 5. Sanitize tray & tomlinson tap
